

INDEPENDENT WHOLE OF MARKET LENDING/STRUCTURE REVIEW

It is becoming increasingly important for Trustees to demonstrate a wholly independent market review has been undertaken when finance is put in place, or a renewal of finance is being undertaken, to ensure the client is receiving the best advice.

As a Trustee we know that you value your Trustee Responsibilities highly, and to assist we can provide a fully independent "whole of market" review of your clients lending to see how their current lending terms compare with the marketplace.

In addition Banks and finance houses are continuously reviewing their policies towards lending to overseas/offshore entities and structures. We are seeing a growing number of financial institutions being reluctant to renew lending structures for existing clients who have previously enjoyed a good relationship with the institution.

With our knowledge of the different types of finance available, the active lenders and relative terms for different projects, we are able to provide a comprehensive recommendation based on current market information.

From as little as £1500 Knox Capital Solutions can prepare a comprehensive report which will appraise how your client's terms compare to those currently available in the market.

This will also encompass whether the current ownership structure will be accepted and/or accommodated by the current lender and what alternatives there are for consideration.
